PROFESSIONAL SUMMARY

Analytical professional with a B.Tech in Computer Science and an ongoing PGCM in Business Analytics. Experienced in secondary research, data analysis, ETL pipelines, SQL, Power BI, and AI-assisted research workflows. Skilled at transforming structured and unstructured information into actionable business insights through data visualization, exploratory analysis, and executive-ready research reports.

TECHNICAL EXPERTISE

- Programming & Databases:** SQL (Joins, CTEs, Window Functions, Views, Subqueries), MySQL, PostgreSQL, Python (Pandas, NumPy, Matplotlib, Seaborn), Data Warehousing, Data Modeling
- Data Visualization & BI:** Power BI, DAX, Power Query, Excel (Pivot Tables, XLOOKUP, INDEX-MATCH)
- Data Analytics & Engineering:** Exploratory Data Analysis (EDA), Data Cleaning, Data Transformation, Data Modeling, ETL, Statistical Analysis
- AI, Automation & APIs:** ChatGPT, Claude, Perplexity AI, n8n, API Integration, AI-Assisted Data Analysis
- Development & Deployment Tools:** Git, GitHub, Cloudflare, CLI/Terminal, REST APIs, Astro, Tailwind CSS

PROFESSIONAL EXPERIENCE

Business Data Analyst | BIT Infotech July 2026 – August 2026
Vadodara, Gujarat, India

- Improving data readiness for analytics projects by extracting, cleaning, and validating structured datasets using SQL, Python, and Excel.
- Supporting business decision-making by identifying trends and performance indicators through exploratory data analysis and statistical techniques.
- Delivering interactive Power BI dashboards that transformed analytical findings into accessible business insights for reporting.

Full Stack Developer | 1Stop.ai December 2024 – March 2025
Remote

- Developed and maintained responsive web applications across frontend and backend components, focusing on functionality, usability, and performance.
- Integrated APIs, backend services, and databases to support reliable data flow and application functionality.
- Used Git, GitHub, and CLI-based development workflows for version control, development, and deployment.

Marketing Operations Analyst | Aeozo May 2024 – Oct 2024
Remote

- Analyzed engagement and campaign performance metrics to optimize digital marketing effectiveness.
- Leveraged AI-powered tools to improve content strategy and audience reach through data-driven insights.

KEY ADVANCED ANALYTICS PROJECTS

AI Data Analyst Agent (Ongoing) Python, Streamlit, Groq/Llama, DuckDB, Plotly
[GitHub Link](#)

- Developing an AI-powered data analyst agent that enables users to analyze CSV datasets using natural language through LLM-driven SQL queries, Python execution, and interactive visualizations.
- Engineered a secure execution framework with sandboxed Python, restricted SQL access, execution timeouts, and hallucination safeguards to ensure safe and reliable AI-assisted analysis.
- Built an automated analytics engine that generates statistical insights, trend analysis, and interactive Plotly dashboards while supporting controlled data transformation workflows.

United States National Student Safety Analytics Platform MySQL, SQL, Power BI, DAX, Excel
[GitHub Link](#)

- Engineered an end-to-end ETL pipeline by extracting, cleaning, transforming, and loading nationwide student safety and civil rights data into a MySQL star schema data warehouse optimized for analytical reporting.
- Developed 25+ advanced SQL queries using CTEs, Window Functions, Views, CASE statements, and Joins, and built a four-page interactive Power BI dashboard with DAX measures to analyze student enrollment, disciplinary actions, victimization, IDEA, ELL, and civil rights allegations across U.S. states.

- Designed executive-ready dashboards featuring KPI cards, geospatial analysis, demographic insights, and interactive visualizations to uncover nationwide trends and support data-driven policy and operational decision-making.

Vendor Performance & Supply Chain Analytics

Python, MySQL, PowerBI ,Power Query,Excel

[GitHub Link](#)

- Identified supplier concentration risk by analyzing **10,692 procurement transactions**, revealing that the top 10 vendors accounted for **65.69%** of total purchase volume.
- Determined that purchase price had minimal influence on profitability ($r = -0.016$), enabling margin analysis to focus on operational rather than pricing factors.
- Improved data reliability by detecting pricing anomalies and negative-margin transactions through automated validation and outlier detection techniques.

Customer Shopping Behaviour Analytics

Python, PostgreSQL, Power BI

[GitHub Link](#)

- Built an end-to-end ETL pipeline to transform a **3,900-record** retail dataset into an analysis-ready format for customer behavior and revenue analysis.
- Identified key customer segments and purchasing patterns through SQL-based analysis, revealing Young Adults as the highest revenue-generating demographic.
- Enabled business performance monitoring by developing an interactive Power BI dashboard tracking sales, customer behavior, and operational KPIs.

EDUCATION & CERTIFICATIONS

MIT School of Distance Education

April 2026 – April 2027

Post Graduate Certificate in Management (PGCM) – Business Analytics

Parul University

Mar 2021 – Mar 2025

Bachelor of Technology (B.Tech) – Computer Science (CGPA: 7.0)

- Tata GenAI Powered Data Analytics
- HackerRank SQL (Basic, Intermediate, Advanced)
- Deloitte Data Analytics Job Simulation
- NPTEL Data Analytics with Python

Publications:

- Task List Management System: Research on System Architecture and Methodology* – International Journal of Scientific Research in Engineering and Management (IJSREM), Mar 2025.

LANGUAGES

- English:** C1 Proficiency (PTE Academic Score: 83/90) | **Hindi:** Native/Bilingual
